Project Management is "one of the most in-demand and financially lucrative professions... 15.7 million new project management roles are expected to have been created globally, growing the economic impact of the profession to USD \$6.61 trillion" Source: Business Wire Feb 2015

Why Get Certified in Project Management?

TOP 10 REASONS

- 1 Achieve Business Results
- 2 Attract the Attention of Fortune 500 Companies
- 3 Command a Higher Salary
- 4 Become Internationally Recognized
- 5 Learn the Specific Language of Success
- 6 Earn an Unbiased Endorsement by The Project Management Institute (PMI®)
- 7 Obtain Highly Sought After PMI® Credentials
- 8 Tap Into a Network of Professionals with Experience and Resources
- 9 Understand and Manage all 10 Knowledge Areas of Project Management
- 10 Utilize the International Standard for Project Management

Project Management is a discipline.

It is the indispensable skill set required to achieve tangible business results.

Get PMP® or CAPM® Certified Today!

You may be one of the growing numbers of individuals seeking career advancement and job security in a weak global economy. Earning an internationally recognized and specialized certification, as a project management professional (PMP®) or as a certified associate in project management (CAPM®), will enable you to distinguish yourself and advance your career. For your benefit, **CertifiNOW** has developed an advanced course that condenses a year's worth of preparation into a 4-day class filled with study guides, processes, and test taking strategies to enable you to pass – on your 1st attempt – the Project Management Institute's PMP® and CAPM® certification exams. Our certification exam prep courses are designed around a project management framework, defined by the Project Management Institute (PMI®). In **CertifiNOW** classes, PMI's Guide to the Project Management Body of Knowledge (PMBOK®) is strategically demystified so that the students can comprehend it and skillfully apply its relevant information towards passing PMI's PMP® and CAPM® certification exams.

For Members Only

Unlike open enrollment classes offered by **CertifiNOW**, this special private class is limited to the members of NMBBAA and the employees of their corporate sponsors and corporate partners:

- Atlanta, NMBBAA Chapter members
- Employees of Atlanta Chapter corporate sponsors and corporate partners

Why the Urgency?

Recently 90 percent of executives surveyed claimed that project management is either critical or important to their operations, while a mere 37 percent of respondents felt their firm did, at least, a "very good" job of managing important projects. *"Employers tend to feel that the M.B.A. graduates are strong in technical business areas like finance and accounting but need more project management skills"*. A recent PMI® study indicates that more than 1.2 million new project management jobs will be created every year for the next 10 years.

A Course Designed For You

This course is designed for busy professionals and business owners with very little time, but nevertheless, have the desire to increase their credibility in the marketplace by earning PMI® (Project Management Institute) certification as a PMP® (Project Management Professional) or CAPM® (Certified Associate in Project Management).

This course reduces preparation time required to pass internationally accepted certification exams -- from 12 months down to 4 days -- of classroom instruction. For individuals not seeking certification, this course is beneficial because it provides a solid theoretical framework, the proper paradigm for thinking about the project management profession, and provides insights into the "art and science" of getting things accomplished. **CertifiNOW**, the course provider, specializes in advanced certification training for professionals and consultants in virtually every major industry.

This is an accelerated learning course that teaches the core information in the following **10 Knowledge Areas of Project Management:**

1. Scope Management	5. Communications Management
2. Time Management	6. Human Resource Management
3. Cost Management	7. Risk Management
4. Quality Management	8. Procurement Management
5. Integration Management	10. Stakeholder Management

Two additional modules on the special application areas of Social Responsibility and Exam Strategy are also included in the course.

Why Offer a Guarantee?

We offer a guarantee because our PMP® or CAPM® Prep course works! It has been progressively fine-tuned for several years. (Thus, it is both modern and proven.) During that period, virtually all candidates who took this course did, in fact, pass on their first attempt.

Location

Clark Atlanta University
School of Business Administration - Wright Young Hall
223 James P. Brawley Drive, S.W.
Atlanta, GA 30314

Dates

This course will be offered on 4 Saturdays: Nov 4, Nov 11, Nov 18, & Dec 2, 2017.

Price
